

RYAN LEITE ALBUQUERQUE

SENIOR SOFTWARE ENGINEER

ryan.leite@gmail.com • +55 81 98255-0011 • Fortaleza, Ceará, BR • LinkedIn

Senior backend engineer with 26 years building production systems, currently designing Python (Django/Flask) services and JSON:API-conformant REST APIs while owning the CI/CD pipeline end to end. Polyglot by necessity rather than preference – has delivered production systems in Java, C, PHP, Ruby and Python, giving strong instincts for which problems are genuinely language-specific and which are architectural. Earlier career spent defining software configuration management practice at institute scale, including leading a 10-engineer team through a CMMI Level 3 appraisal as a trained SCAMPI evaluator. M.Sc. in Computer Science (Artificial Intelligence).

EXPERIENCE

Senior Backend Software Engineer

Oct 2022

CESAR (Centro de Estudos e Sistemas Avançados do Recife) · Recife, PE, Brazil

Backend engineering and CI/CD ownership for two concurrent web platforms.

- Build and maintain backend services for two concurrent web platforms in Python (Django and Flask), enforcing production-grade quality through automated formatting, linting and test gates in CI.
 - Design and implement REST APIs to the JSON:API specification, standardizing response contracts across teams and reducing integration rework between backend and frontend squads.
 - Own the CI/CD pipeline end to end (Docker, Git/GitFlow, Jenkins), delivering fully automated build, test and deployment cycles.
-

Senior Full-Stack Software Engineer

Jun 2013 - Sep 2022

CESAR (Centro de Estudos e Sistemas Avançados do Recife) · Recife, PE,
Brazil

Full-stack development, configuration management and technical leadership across four client projects over nine years.

- Delivered four production web applications using PHP (Yii), Python (Flask/Falcon), Ruby on Rails and JavaScript (Backbone/Marionette, EmberJS, VueJS).
- Built and maintained CI/CD environments with Git/GitFlow, TeamCity, Jenkins, Ansible and HashiCorp Vault, enabling secure, repeatable and fully automated deployments.
- Led technical direction for Scrum teams, running sprint planning, code review practice and delivery commitments.

Senior Full-Stack Software Engineer

Jan 2009 - Jun 2013

CESAR (Centro de Estudos e Sistemas Avançados do Recife) · Recife, PE,
Brazil

Full-stack and configuration management engineering across telephony, enterprise web and mobile projects.

- Developed a telephony platform in C on Asterisk, covering call flow logic and integration.
 - Built an enterprise web and mobile application end to end using Java EE/ME, Android, Apache Struts 2, Apache CXF, Spring, Hibernate, Oracle and Apache Tomcat.
 - Implemented a complete CI/CD environment (Subversion/Git, Maven, TeamCity, Tomcat) for automated builds and deployments.
 - Built a Scrum task-board integration for Mantis (PHP) that gave distributed remote teams shared sprint visibility.
 - Maintained a nationwide production web platform while shipping new features against live traffic.
-

Senior Software Configuration Management Engineer

Jan 2005 - Jan 2009

CESAR (Centro de Estudos e Sistemas Avançados do Recife) · Recife, PE,
Brazil

Led the company-wide Software Configuration Management team and drove the organization's CMMI 1.2 Level 3 appraisal.

- Led a 10-engineer Software Configuration Management team through a successful formal CMMI 1.2 Level 3 appraisal, serving as a trained SCAMPI evaluator.
 - Defined and maintained company-wide SCM processes as SCM lead within the Software Engineering Process Group (SEPG).
 - Rolled out SCM processes across multiple concurrent projects using Rational ClearCase, ClearDDTS, CVS, Subversion, Mantis, Apache Ant and Luntbuild.
 - Built automation tooling and Mantis extensions (PHP, Shell) for defect tracking, requirements traceability and code review reporting, later adopted as company-wide standards.
-

Software Configuration Management Engineer

Oct 2001 - Jan 2005

CESAR (Centro de Estudos e Sistemas Avançados do Recife) · Recife, PE,
Brazil

SCM process definition and rollout for multi-site mobile device development programs.

- Defined and implemented SCM processes for multi-site mobile device development projects using Rational ClearCase and ClearDDTS, contributing to the organization's CMM Level 2 certification.
 - Raised client evaluation scores for SCM performance by approximately 20% by automating configuration management activities across roughly twelve projects.
-

Junior Software Engineer

Jan 2001 - Oct 2001

CESAR (Centro de Estudos e Sistemas Avançados do Recife) · Recife, PE,
Brazil

Early-stage mobile application development on Java 2 Micro Edition (J2ME).

- Pioneered J2ME application development at CESAR, establishing the institute's first mobile development practice.
 - Developed 15+ mobile applications, primarily games, for early Java-enabled handsets.
 - Authored Sea Hunter, awarded Best Application from the Americas at the Asia Java Mobile Challenge.
-

Junior Software Engineer

Jun 2000 - Dec 2000

CESAR (Centro de Estudos e Sistemas Avançados do Recife) · Recife, PE, Brazil

Java development on a standard three-tier architecture.

- Developed a WAP application in J2SE for lottery game management.
- Built an e-commerce portal used to validate a team member's M.Sc. dissertation research.

SKILLS

BACKEND

Expert

Python, Django, Flask, Falcon, PHP, Yii, Laravel, Ruby on Rails, Java, C, REST API, JSON:API

FRONTEND

Advanced

JavaScript, TypeScript, VueJS, NuxtJS, EmberJS, Backbone/Marionette, HTML, CSS, SCSS/SASS, BEM

DEVOPS & CI/CD

Expert

CI/CD, Jenkins, TeamCity, GitLab CI, Docker, Ansible, HashiCorp Vault, Bash, Git, GitFlow, GitHub, GitLab

CLOUD & ORCHESTRATION

Intermediate

Google Cloud, AWS, Kubernetes

DATABASES

Advanced

PostgreSQL, MySQL, Oracle, Redis

PROCESS & LEADERSHIP

Expert

Software Configuration Management, CMMI, SCAMPI appraisal, Scrum, Kanban, Technical Leadership, Code Review, Mentoring

Federal University of Pernambuco (UFPE)

Mar 2000 - Aug 2002

M.Sc. in Computer Science

Specialization in Artificial Intelligence. Dissertation: "KAGENT – A Java API for Intelligent Agents in Mobile Devices" (available at repositorio.ufpe.br).

Artificial Intelligence · Multi-Agent Systems · Software Engineering

Federal University of Ceará (UFC)

Jan 1996 - Jan 2000

B.Sc. in Computer Science

PUBLICATIONS

Software Configuration Management Diversity: A Commercial Case Study

2008-07

BCS-CMSG – The CMDB and CMS: the Powerhouse of Service Management

Authors: T. H. B. Oliveira, R. Albuquerque.

Desenvolvendo Projeto Conceitual de Jogos Wireless (Developing Conceptual Design for Wireless Games)

2002-10

1st Brazilian Workshop on Games and Digital Entertainment (WJOGOS), SIBGRAPI 2002, Fortaleza, Brazil

Authors: D. R. Silva, A. Damasceno, E. Perazzo, P. Macedo, R. Albuquerque, G. L. Ramalho.

Embedding a J2ME-Based Inference Engine in Handheld Devices: The KEOPS Case Study

2002

Workshop on Ubiquitous Agents on Embedded, Wearable and Mobile Devices, Italy

Authors: R. Albuquerque, P. Guedes, C. Figueira Filho, J. Robin, G. Ramalho.

KSACI: A Handheld Device Infrastructure for Agent Communication

2001

ATAL 2001 Conference, Seattle, USA

Authors: R. Albuquerque, J. Hubner, G. Eliano de Paula, J. Sichman, G. Ramalho.

AWARDS

Best Application from the Americas – Sea Hunter

2001

Asia Java Mobile Challenge

Awarded for Sea Hunter, a J2ME mobile game developed for early Java-enabled handsets.

CERTIFICATES

Certified ScrumMaster (CSM)

2017-10

Scrum Alliance

Zend PHP Certified Developer

2014-10

Zend Technologies, Ltd.
